Over the past 30 years, Dr. Mickiewicz has developed a comprehensive practice that truly integrates medicine and dentistry. Creating a "clinic without walls," Dr. Mickiewicz has partnered with major medical groups in Northern California to treat complex facial pain and sleep issues, often as the doctor of last resort. He is a pioneer in the use of oral appliances for treating sleep apnea and other breathing disorders. Known throughout the medical and dental community for his vast, evidenced-based knowledge, he is called upon to testify as an expert, render second opinions and to be an educator for both physicians and dentists. Decades spent as a restorative dentist strengthen his resolve to provide patients with the most conservative treatment, while embracing cutting-edge, alternative pain, breathing and orthodontic therapies. Dr. Mick's spare time is devoted to family and local philanthropic endeavors focused on health care innovation and theater arts.
